

## About Our Range of Ocean Harvested Products

### Most

of our raw ocean-harvested materials are caught in areas close to our home island of Værøy, very often only about 2-4 hours journey from our factory. This guaranteed freshness, combined with our long experience in the ocean products business, contributes to our well-known reputation for supplying only the highest quality fish products.

### Wet salted fish:

Fresh quality raw material from Cod, Ling, Haddock, Tusk, Saithe. A range of packing options are offered at clients request.

### Fresh fish:

We pack fresh fish for export and for domestic market. A range of packing options offered at clients request.

### Roe products :

We produce roe from a variety of different species, including Cod, Haddock, Saithe and Lumpfish. A range of packing and marinating options are available according to clients request.

Black halibut :

Chosen from fresh, highest quality raw material, we produce fresh and frozen packaged cuts. J-cut / N-cut, heads of both cuttings and tails as well. Standard packing is in 20 kg cartons.
